

The Clone Tuning Machines

Time Machine Collection

The Clone tuning machine for Gibson style guitars

These great reproduction tuners provide a more musical sound by utilizing brass posts, gears and washers.....just like the vintage Kluson tuners used on Gibson guitars up until 1975. Available in single ring or double ring configuration with discolored tips of correct shape and size. Manufactured by the world famous Gotoh company, so you can be assured of outstanding quality. Complete with vintage correct bushings.
